What is claimed is:

- 1. An absorbent article (40) configured for disposition within the vestibule (42) of a female wearer and having an improved efficacy at maintaining disposition within the vestibule, the absorbent article comprising an absorbent (66), the absorbent having a length, a width and an upper surface, the upper surface having a surface area, wherein: the length of the absorbent is no less than about 40 mm; the length of the absorbent is no greater than about 80 mm; the width of the absorbent is no less than about 50 mm; the width of the absorbent is no greater than about 40 mm; the surface area of the upper surface is no less than about 700 mm²; and the surface area of the upper surface is no greater than about 1,700 mm².
 - The absorbent article of claim 1, wherein the surface area of the upper surface is no less than about 900 mm².
- The absorbent article of claim 1, wherein the surface area of the upper surface is no less than about 1,100 mm².
 - The absorbent article of claim 1, wherein the length of the absorbent is no less than about 45 mm.
 - The absorbent article of claim 1, wherein the length of the absorbent is no less than about 50 mm.
- The absorbent article of claim 1, wherein the width of the absorbent is no less than
 about 10 mm.
 - The absorbent article of claim 1, wherein the width of the absorbent is no less than
 about 15 mm.
- 30 8. The absorbent article of claim 1, wherein the absorbent further comprises a superabsorbent polymer.
 - An absorbent article (40) configured for disposition within the vestibule (42) of a female wearer and having an improved efficacy at maintaining disposition within the vestibule,

the absorbent article comprising an absorbent (66), the absorbent having a length, a width and an upper surface, the upper surface having a surface area, wherein: the length of the absorbent is no less than about 50 mm; the length of absorbent is no greater than about 90 mm; the width of the absorbent is no less than about 15 mm; the width of the absorbent is no greater than about 50 mm; the surface area of the upper surface is no less than about 1,700 mm²; and the surface area of the upper surface is no greater than about 2,400 mm².

- 10. The absorbent article of claim 9, wherein the surface area of the upper surface is no less than about $1{,}900 \text{ mm}^2$.
- 11. The absorbent article of claim 9, wherein the surface area of the upper surface is no less than about 2.100 mm^2 .
- The absorbent article of claim 9, wherein the length of the absorbent is no less than about 55 mm.
 - The absorbent article of claim 9, wherein the length of the absorbent is no less than about 60 mm
- 20 14. The absorbent article of claim 9, wherein the length of the absorbent is no less than about 65 mm.
 - 15. The absorbent article of claim 9, wherein the length of the absorbent is no less than about 70 mm.
 - 16. The absorbent article of claim 9, wherein the width of the absorbent is no less than about $20\ \mathrm{mm}$.
- 17. The absorbent article of claim 9, wherein the absorbent further comprises a 30 superabsorbent polymer.
 - 18. An absorbent article (40) configured for disposition within the vestibule (42) of a female wearer and having an improved efficacy at maintaining disposition within the vestibule, the absorbent article comprising an absorbent (66), the absorbent having a length, a width and an

20

upper surface, the upper surface having a surface area, wherein: the length of the absorbent is no less than about 70 mm; the length of the absorbent is no greater than about 100 mm; the width of the absorbent is no less than about 50 mm; the surface area of the upper surface is no less than about 2,400 mm²; and the surface area of the upper surface is no greater than about 3.100 mm².

- The absorbent article of claim 18, wherein the surface area of the upper surface is no greater than about 2.600 mm².
- 10 20. The absorbent article of claim 18, wherein the surface area of the upper surface is no greater than about 2,800 mm².
 - The absorbent article of claim 18, wherein the width of the absorbent is no less than about 10 mm.
 - 22. The absorbent article of claim 18, wherein the length of the absorbent is no less than about 75 mm
 - The absorbent article of claim 18, wherein the length of the absorbent is no less than about 80 mm.
 - 24. The absorbent article of claim 18, wherein the absorbent further comprises a superabsorbent polymer.
- 25. An absorbent article (40) configured for disposition within the vestibule (42) of a female wearer and having an improved efficacy at maintaining disposition within the vestibule absent the effective assistance of a stay-in-place means, the absorbent article comprising an absorbent (66), the absorbent having a length, a width and an upper surface, the upper surface having a surface area, wherein: the length of the absorbent is no greater than about 100 mm; the width of the absorbent is no greater than about 50 mm; and the surface area of the upper surface is no greater than about 3,100 mm².
 - 26. The absorbent article of claim 25, wherein the surface area of the garment facing surface is no less than about 700 mm².

15

25

- The absorbent article of claim 25, wherein the width of the absorbent is no less than about 5 mm
- 5 28. The absorbent article of claim 25, wherein the width of the absorbent is no less than about 10 mm.
 - The absorbent article of claim 25, wherein the width of the absorbent is no less than about 15 mm.
 - The absorbent article of claim 25, wherein the width of the absorbent is no less than about 20 mm.
 - The absorbent article of claim 25, wherein the length of the absorbent is no less than about 40 mm.
 - The absorbent article of claim 25, wherein the length of the absorbent is no less than about 45 mm
- 20 33. The absorbent article of claim 25, wherein the length of the absorbent is no less than about 50 mm.
 - The absorbent article of claim 25, wherein the length of the absorbent is no less than about 60 mm.
 - The absorbent article of claim 25, wherein the length of the absorbent is no less than about 70 mm.
- The absorbent article of claim 25, wherein the length of the absorbent is no less than
 about 80 mm.
 - 37. The absorbent article of claim 25, wherein the absorbent further comprises a superabsorbent polymer.
